SUBJECTIVE SOCIAL STATUS

Subjective social status compared to community

Revised wording:

1) Now, I'm going to ask you to envision a ladder. Think of this ladder as representing where people stand in their communities. At the top of the ladder are the people who are best off—those who have the most money, the most education, and the most respected jobs. At the bottom are the people who are the worst off—who have the least money, least education, and the least respected jobs or no job. The higher up you are on this ladder, the closer you are to the people at the very top and the lower you are, the closer you are to the people at the very bottom. On a scale of 1 to 10, 1 being the worst off, or on the bottom of the ladder, and 10 being the best off or top, where would you place yourself on this ladder?

Least money										Most money
Least education										Most education
Least respected job or no job										Most respected jobs
	1	2	3	4	5	6	7	8	9	10

Original wording:

Think of this ladder as representing where people stand in their communities.

People define communities in different ways; please define it in whatever way is most meaningful to you. At the top of the ladder are the people who have the highest standing in their community. At the bottom are the people who have the lowest standing in their community.

Where would you place yourself on this ladder?

Please place a large "X" on the rung where you think you stand at this time in your life, relative to other people in your community.
